Profile Summary

With 3+ years of dedicated experience in **Web** and **Android** App Development, I bring a robust combination of technical proficiency and design sensibility. Beyond coding, my deep understanding of UX and a refined UI design sense set me apart. I have a proven track record in delivering scalable solutions, collaborating seamlessly across functions, and staying ahead of industry trends. I'm Eager to contribute my professional touch to a dynamic team while staying at the forefront of emerging skills.

Professional Skill

Programming Languages: Fluent in JavaScript, proficiency in C, C++, Python, Java

Front-End Technologies

- HTML, CSS, Bootstrap, Tailwind for building responsive and aesthetically pleasing web interfaces
- JavaScript, React JS, React Native, Redux toolkit and Next JS for interactive and dynamic user experiences
- Solid understanding of UI/UX design principles to create user-centered interfaces

Back-End and Database

- Node JS and Express JS for developing robust Backend and scalable APIs
- Data expertise with proficiency in both NoSQL (MongoDB, Sanity) and SQL databases
- Experience with serverless platforms like Firebase and Appwrite for efficient development

Additional Expertise

- Cross-platform mobile development: React Native to build mobile apps for both android and ios
- Git • RESTful API • Testing & Debugging • Server Management & Web Services • AWS & Azure • Project Management
